Re: CIBA-GEIGY Corporation
Ren Plastics Division

Dear Sir or Madam:

Enclosed please find a completed EPA Form 8900-1 regarding existing contamination at property leased by the above named company in Lansing, Michigan. This contamination, although apparently present for some time, was only recently discovered. EPA was notified of the contamination promptly upon discovery (copy of correspondence enclosed), as was the State of Michigan. This form is being submitted pursuant to an EPA request in response to our notification. The company is working with a consultant and the Michigan Department of Natural Resources to determine the appropriate remedial action.

Very truly yours,

Nicholas L. Tartaglione
Plant Manager
